Background

The Florida Power and Light Company has requested easements as delineated on attachments in order to provide utility requirements to the new HOPE VI-Phase II development. PHCD has no objection to these proposed locations

The HOPE VI redevelopment project was made possible by the U.S. Housing and Urban Development (HUD) 1999 grant, which has been leveraged with other funding sources to facilitate the financial viability of the project.

Phase II of the redevelopment effort was started immediately after the execution of a Master Development Agreement (MDA) with the HOPE VI-Phase II developer, McCormack Baron Salazar, Inc. (MBS) in December 2008, and is anticipated to be completed by the end of 2012. A total of 354 family rental units are planned for this phase, of which 177 are public housing units, 107 are low and moderate income units and 70 are market-rate units.
